

Research Computing Seminar Series 2008-9

Emerging Applications and Challenges for Geovisual Analytics Research

Brian Tomaszewski

Professor
CAST-CMS, RIT

Brian will discuss his Geovisual Analytics work on using web-based tools such as maps, timelines, and concept graphs to visually represent places and keywords extracted from news stories. He will also relate his experience in contextualizing humanitarian crisis situations to emerging applications and challenges.

3:30 pm Thursday, Apr 16, 2009
IT Collaboratory Bldg. 17-3110
